Profile Summary

Computer Science undergraduate with strong foundations in Data Structures, Algorithms, Object-Oriented Programming, and Software Engineering. Experienced in building full-stack web applications using React, Node.js, MongoDB, and Java-based backend systems. Passionate about solving real-world problems through scalable software solutions and continuously learning new technologies.

Education

RGM College of Engineering & Technology (RGM CET), Nandyal

B.Tech in Computer Science Engineering

A.P Model School & Jr. College, Kurnool

Intermediate (MPC)

CGPA: 9.47/10

2023 – 2027 (Expected)

95%

2021 – 2023

Experience

Java Full Stack Developer Intern — Infosys Springboard

Nov 2025 – Jan 2026

- Built a Java full-stack SiteSurvey application using Spring Boot and MySQL.
- Developed REST APIs and implemented backend features for core application functionality.
- Collaborated with a team to design and develop modules for the SiteSurvey tool.
- Participated in project discussions to plan features and improve application performance.
- Gained practical experience in backend development, API integration, and collaborative workflows.

Projects

SkillSwap — Real-Time Peer Learning Platform

Live | GitHub

Tech Stack: React.js, Node.js, MongoDB, Socket.io

- Built a full-stack peer learning platform supporting real-time communication using React, Node.js, MongoDB, and Socket.io.
- Implemented real-time chat and notifications using Socket.io.
- Integrated Jitsi Meet SDK to enable live one-on-one video learning sessions.
- Developed secure authentication using JWT and bcrypt.

College Enquiry Chatbot — AI-Based Web Application

Live | GitHub

Tech Stack: Python, Flask, Gemini API

- Developed a chatbot to handle student queries related to admissions and campus information.
- Integrated Gemini AI for context-aware responses.
- Designed conversational logic to deliver accurate and structured information.

DocSpot — Healthcare Appointment System

Live | GitHub

Tech Stack: React.js, Node.js, Express.js, MongoDB

- Built a full-stack web application for booking doctor appointments and managing patient data.
- Designed RESTful APIs for scheduling and data handling, supporting 50+ test users.
- Developed role-based dashboards with secure authentication for doctors and users.
- Integrated frontend and backend services to handle 100+ appointment requests during testing.

Technical Skills

Programming Languages: Java, C, JavaScript

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, Flask, REST APIs

Databases: MongoDB, MySQL (Basic CRUD operations, schema design)

Tools: Git, GitHub, Postman, VS Code

Core Concepts: Data Structures and Algorithms (fundamentals), OOP

Achievements & Certifications

- Led Cre8 Club, organizing technical events for 100+ students and actively participating in hackathons, collaborating on innovative solutions in team-based development environments.
- Solved 170+ DSA problems on LeetCode and practiced problems and algorithmic concepts on GFG and Coding Ninjas.
- Completed Java Foundation Certification — Infosys Springboard [View]
